Comment Sheet

U.S. Environmental Protection Agency is interested in your comments on the proposed cleanup plan for the Nease Chemical site. EPA will consider public comments before selecting a final cleanup for the site. Please use the space below to write your comments, then fold and mail this form. Comments must be postmarked by Aug. 13. If you have any questions, please contact Susan Pastor at 312-353-1325 or through EPA's toll-free number at 800-621-8431. This comment sheet may also be faxed to her at 312-353-1155. Those with electronic capabilities may submit their comments via the Internet at www.epa.gov/region5/publiccomment/nease-pubcomment.htm.

We, as property owners, across the road from Nease feel it is a disgrace to bring back contaminated soil to our area. We have children living here & playing here and feel it is not a healthy environment for them to grow up in. In addition to this, we ~~we~~ feel that our property value will decrease due to this and run off to our property will confirm this.

I LIVE ON RT 14 NEXT TO NEASE. I DON'T WANT ANYMORE CONTAMINATION NEXT TO ME. TAKE THE CONTAMINATED SOIL FROM THE CREEKS SOME WHERE ELSE. YOU CAN'T TELL ME THIS WON'T LEECH INTO THE SOIL AND FLOW TO SURROUNDING PROPERTIES.

I KNOW FOR A FACT THAT YOU ACF (NEASE) HAVE TESTED PROPERTIES ACROSS THE ROAD (RT 14) FROM THE OLD PLANT AND HAVE FOUND UNDERGROUND CONTAMINATION.

LEAVE THINGS IN THE CREEK ALONE AND LET NATURE HEAL ITSELF

THE CLEAN UP OF THE BEAVER CREEK AND THE CONTAINMENT PLANS FOR THE NEASE SITE APPEAR TO MAKE LOGICAL AND ECONOMIC SENSE. HOWEVER, ONCE THE CONTAMINANTS ARE REMOVED FROM THE CREEK AND SURROUNDING FLOOD PLAINS WHY WOULD ANYONE IN THEIR RIGHT MIND DEPOSIT THEM BACK INTO THE NEASE SITE WHICH IS LOCATED NEAR A GROWING POPULATION BASE?

WHEN THESE CONTAMINANTS ARE COLLECTED THEY SHOULD BE TRANSPORTED TO A HAZARDOUS WASTE LAND FILL WHERE THEY CAN BE DEPOSITED SAFELY.

MY HOME AND NEIGHBORHOOD ARE VERY CLOSE TO THIS PROPERTY. DO NOT MAKE MATTERS WORSE AND FURTHER ENDANGER THE HEALTH OF OUR CHILDREN BY RETURNING THESE CONTAMINANTS TO THE NEASE SITE.

THANK YOU FOR YOUR CONSIDERATION:

To Whom It May Concern,

My husband & I & sons own and operate a dairy farm which the middle fork of Little Beaver Creek completely crosses. It is in the 35 designated mark with 3 sets of (xxx's) targeted for soil removal. This area is fenced off so our dairy cattle cannot graze in it. We have been contacted by Sheila Abradine, about the cleanup. Since we know the creek better than anyone, we would like to be contacted by whomever does the cleanup at the time it is done. So we can point out the pockets of deep sediment - not just mark it on a map, but actually walk the creek with a person and point out those deep pocket areas.

We also understand that sometime in the future we may be able to have our cattle graze in that area where they cannot now.

The health department run tests on our milk to test for mines and other chemicals. I understand after the cleanup, nothing should show up. What if it does? The Ohio Department of Health and the dairy where we ship our milk had previously told us our milk license would be revoked if anything showed up and we could be shut down. This is our only income. What do we do then is my question?
